Rating	Description
5	Strongly Agree
4	Agree
3	Neutral
2	Disagree
1	Strongly Disagree

Department of Computing and Informatics

Evaluation of the improved medical tracking service in ensuring the timely completion of patient requirements through requirement verification, laboratory sample tracking, and service completion monitoring.

STATEMENT	Strongly Agree (5)	Agree (4)	Neutral (3)	Disagree (2)	Strongly Disagree (1)
For All Respondents					
A. Medical Service Tracking					
1. The system effectively tracks the progress of patients throughout the medical service process. (<i>Epektibong nasusubaybayan ng sistema ang pag-usad ng pasyente sa buong proseso ng serbisyong medikal.</i>)					
2. The system provides accurate and up-to-date information regarding the current status of each patient's medical service. (<i>Nagbibigay ang sistema ng tumpak at napapanahong impormasyon tungkol sa kasalukuyang estado ng serbisyong medikal ng bawat pasyente.</i>)					
3. The medical service tracking feature helps reduce delays in completing patients' medical requirements. (<i>Nakakatulong ang tampok na pagsubaybay sa serbisyong medikal upang mabawasan ang pagkaantala sa pagkumpleto ng mga kinakailangang proseso ng pasyente.</i>)					
For All Respondents EXCEPT Patients					
B. Requirement Verification					
1. The system accurately verifies patient requirements before medical services are processed. (<i>Tumpak na bina-verify ng sistema ang mga kinakailangan ng pasyente bago isagawa ang serbisyong medikal.</i>)					
2. The system helps ensure that all required documents and records are complete before proceeding to the next stage. (<i>Tinutulungan ng sistema na matiyak na kumpleto ang labat ng</i>					

Department of Computing and Informatics

<i>kinakailangang dokumento at rekord bago magpatuloy sa susunod na proseso.)</i>					
3. The requirement verification process minimizes delays caused by incomplete patient requirements. <i>(Nababawasan ng proseso ng beripikasyon ang mga pagkaantalang dulot ng hindi kumpletong mga kinakailangan ng pasyente.)</i>					
For Owner/Administrator and IT Experts					
C. Laboratory Sample Tracking					
1. The system accurately tracks laboratory samples from collection to the release of results. <i>(Tumpak na nasusubaybayan ng sistema ang mga laboratory sample mula sa pagkuha hanggang sa paglabas ng resulta.)</i>					
2. The system enables laboratory personnel to efficiently monitor the status of patient laboratory samples. <i>(Pinapadali ng sistema para sa mga kawani ng laboratoryo ang pagsubaybay sa kalagayan ng mga laboratory sample ng pasyente.)</i>					
3. The laboratory sample tracking feature reduces the risk of delayed or misplaced samples. <i>(Nakakatulong ang tampok na pagsubaybay sa laboratory sample upang mabawasan ang posibilidad ng pagkaantala o pagkawala ng mga sample.)</i>					
For All Respondents					
D. Service Completion Tracking					
1. The system effectively monitors the completion of all required medical services for each patient. <i>(Epektibong namomonitor ng sistema ang pagkumpleto ng labat ng kinakailangang serbisyon medikal para sa bawat pasyente.)</i>					
2. The system provides timely updates regarding pending and completed medical services. <i>(Nagbibigay ang sistema ng napapanahong mga update</i>					

Department of Computing and Informatics

<i>tungkol sa mga serbisyong medikal na nakabinbin at natapos na.)</i>					
3. The service completion monitoring feature helps ensure that patients complete all required medical services on time. <i>(Nakakatulong ang tampok na pagmamanman sa pagkumpleto ng serbisyo upang matiyak na natatapos ng mga pasyente ang labat ng kinakailangang serbisyong medikal sa tamang oras.)</i>					

Comparison of the efficiency of the current manual clinic processes with the proposed system in terms of appointment scheduling, walk-in patient handling, and medical clearance processing.

STATEMENT	Strongly Agree (5)	Agree (4)	Neutral (3)	Disagree (2)	Strongly Disagree (1)
For All Respondents					
A. Appointment Scheduling					
1. The time required to complete appointment scheduling is different under the proposed system than the previous manual process. <i>(Ang oras na kinakailangan upang makumpleto ang pag-iskedyul ng appointment ay naiiba sa iminungkabing sistema kaysa sa dating manu-manong proseso.)</i>					
2. Appointment records are organized differently under the proposed system than the previous manual process. <i>(Ang mga talaan ng appointment ay inaayos sa ibang paraan sa iminungkabing sistema kaysa sa dating manu-manong proseso.)</i>					
3. The occurrence of scheduling errors and conflicts is different under the proposed system than the previous manual process. <i>(Ang pagkakaroon ng mga pagkakamali at salungatan sa pag-iskedyul ay naiiba sa</i>					

Department of Computing and Informatics

<i>iminungkahing sistema kaysa sa dating manu-manong proseso.)</i>					
For Owner/Administrator, Clinic Staff, and Patient					
B. Walk-in Patient Handling					
1. The waiting time experienced by walk-in patients is different under the proposed system than the previous manual process. (<i>Ang oras ng paghibintay ng mga walk-in na pasyente ay naiiba sa iminungkahing sistema kaysa sa dating manu-manong proseso.)</i>					
2. Walk-in patients are handled differently under the proposed system than the previous manual process. (<i>Ang pag-asikaso sa mga walk-in na pasyente ay isinasagawa sa ibang paraan sa iminungkahing sistema kaysa sa dating manu-manong proseso.)</i>					
3. The process followed by staff in handling walk-in patients is different under the proposed system than the previous manual process. (<i>Ang prosesong sinusunod ng mga kawani sa pag-asikaso sa mga walk-in na pasyente ay naiiba sa iminungkahing sistema kaysa sa dating manu-manong proseso.)</i>					
For All Respondents					
C. Medical Clearance Processing					
1. The time required to process medical clearances is different under the proposed system than the previous manual process. (<i>Ang oras na kinakailangan sa pagproseso ng medical clearance ay naiiba sa iminungkahing sistema kaysa sa dating manu-manong proseso.)</i>					
2. The recording of medical clearance information is handled					

Department of Computing and Informatics

differently under the proposed system than the previous manual process. (<i>Ang pagtatala ng impormasyon sa medical clearance ay isinasagawa sa ibang paraan sa iminungkahing sistema kaysa sa dating manu-manong proseso.</i>)					
3. The time required to release medical clearances is different under the proposed system than the previous manual process. (<i>Ang oras na kinakailangan sa paglabas ng medical clearance ay naiiba sa iminungkahing sistema kaysa sa dating manu-manong proseso.</i>)					

Integration of client trend analytics using Holt-Winters Triple Exponential Smoothing for predicting patient volume and seasonal diseases to help the clinic anticipate daily and monthly patient numbers in terms of daily and monthly patient volume summaries, seasonal disease forecasting, and patient volume forecasting for daily and monthly projections.

STATEMENT	Strongly Agree (5)	Agree (4)	Neutral (3)	Disagree (2)	Strongly Disagree (1)
For Owner/Administrator, Clinic Staff, and IT Expert					
A. Daily and Monthly Patient Volume Summaries					
1. The system clearly presents daily and monthly patient volume summaries. (<i>Malinaw na ipinapakita ng sistema ang araw-araw at buwanang buod ng dami ng mga pasyente.</i>)					
2. The patient volume summaries provide information about changes in the number of patients over time. (<i>Nagbibigay ang mga buod ng dami ng pasyente ng impormasyon tungkol sa pagbabago ng bilang ng mga pasyente sa paglipas ng panahon.</i>)					
3. The daily and monthly summaries provide information that can be used in monitoring patient volume patterns. (<i>Nagbibigay ang araw-araw at buwanang</i>					

Department of Computing and Informatics

<i>buod ng impormasyon na maaaring gamitin sa pagsubaybay sa mga pattern ng dami ng pasyente.)</i>					
B. Seasonal Disease Forecasting					
1. The system presents forecasted information about seasonal disease patterns. <i>(Nagpapakita ang sistema ng pagtatayang impormasyon tungkol sa mga pattern ng pana-panahong sakit.)</i>					
2. The seasonal disease forecasts provide information that may be considered when preparing for expected patient cases. <i>(Nagbibigay ang pagtataya ng mga pana-panahong sakit ng impormasyon na maaaring isaalang-alang sa pagbahanda para sa mga inaasahang kaso ng pasyente.)</i>					
3. The seasonal disease forecasts provide information that may be considered when planning medical supplies and clinic resources. <i>(Nagbibigay ang pagtataya ng mga pana-panahong sakit ng impormasyon na maaaring isaalang-alang sa pagpapalano ng mga kagamitang medikal at iba pang mapagkukunan ng klinika.)</i>					
C. Patient Volume Forecasting for Daily and Monthly Projections					
1. The system presents estimates of future patient volume for daily and monthly periods. <i>(Nagpapakita ang sistema ng pagtataya ng magiging dami ng mga pasyente para sa araw-araw at buwanang panahon.)</i>					
2. The patient volume forecasts provide information that may be considered for staffing, scheduling, and resource planning. <i>(Nagbibigay ang pagtataya ng dami ng mga pasyente ng impormasyon na maaaring isaalang-alang sa pagpapalano ng mga tauban, iskedyul, at mga mapagkukunan.)</i>					
3. The daily and monthly patient volume forecasts provide information that may be considered in clinic operational decisions. <i>(Nagbibigay ang araw-araw at</i>

Client Interview

Name (Optional): _____

Designation: _____

Evaluation of the improved medical service tracking through requirement verification, laboratory sample tracking, and service completion monitoring.

1. How does the clinic currently verify the requirements of patients before providing medical services?

2. What challenges do you encounter in verifying patient requirements?

3. How are laboratory samples currently tracked and monitored in the clinic?

4. What problems are commonly encountered during laboratory sample tracking?

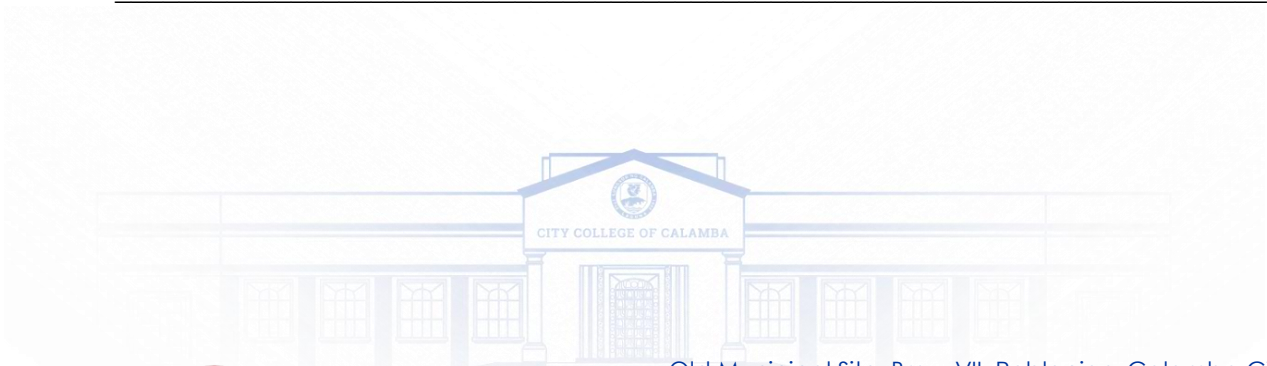

5. How does the clinic monitor whether all patient requirements and medical services have been completed?

6. How is patients' BMI (Body Mass Index) currently recorded and monitored during consultations?

7. What challenges do you encounter in recording or retrieving BMI information?

8. How are patient records currently stored, updated, and retrieved?

9. What problems do you experience with the current method of managing patient records?

Client Interview

Name (Optional): _____

Designation: _____

Comparison of the efficiency of the current manual clinic processes and the proposed system in appointment scheduling, walk-in patient handling, and medical clearance processing.

10. How is the current appointment scheduling process handled in the clinic?

11. In your opinion, how can the proposed system improve the efficiency of appointment scheduling compared with the current manual process?

12. How are walk-in patients currently accommodated and managed?

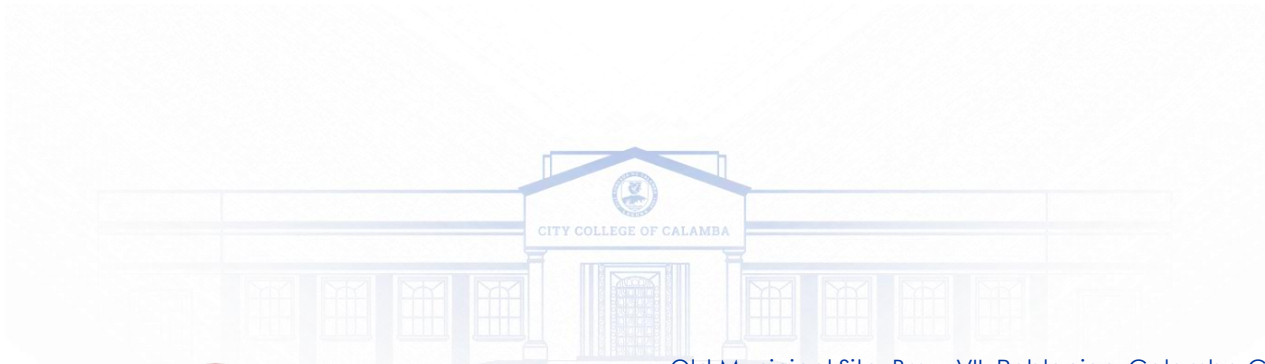

13. How can the proposed system improve the handling of walk-in patients compared with the current process?

14. How can the proposed system improve the efficiency of medical clearance processing compared with the current manual process?

15. How is patient pre-registration currently handled before appointments or clinic visits?

16. What challenges do patients and staff experience during the current pre-registration process?

17. How would an online pre-registration feature improve clinic operations and patient convenience?

Department of Computing and Informatics

Client Interview

Name (Optional): _____

Designation: _____

Assessment of the feasibility of the proposed system in terms of financial feasibility using cost-benefit analysis.

18. What expenses, if any, are involved in carrying out the clinic's current processes? Please specify.

19. What clinic activities require time, personnel, materials, or other resources? Please describe.

20. What changes, if any, do you anticipate if the proposed system is implemented in the clinic?

21. What factors should be considered when determining whether the proposed system is financially feasible for the clinic?

22. What hardware or equipment is currently available in the clinic that may be used for its operations?
Please indicate the type, specifications (if known), and quantity.

Instructions: Please read and check the hardware currently available in the clinic and specify the quantity.

System Evaluation using ISO/IEC 25010 Quality Metrics

Instructions: Read and answer only the sections assigned to your role. This ensures that each part of the system is evaluated by respondents who have sufficient experience with its functions.

Functional Suitability	Strongly Agree (5)	Agree (4)	Neutral (3)	Disagree (2)	Strongly Disagree (1)
For Owner/Administrator, Clinic Staff and IT Expert					
1. The system provides all the necessary functions for tracking medical services, including requirement verification, laboratory sample tracking, and service completion monitoring. (<i>Ibinibigay ng sistema ang lahat ng kinakailangang function para sa pagsubaybay ng mga serbisyong medikal, kabilang ang pagberipika ng mga requirement, pagsubaybay ng mga laboratory sample, at monitoring ng pagkumpleto ng serbisyo.</i>)					
2. The system effectively supports appointment scheduling, walk-in patient handling, and medical clearance processing. (<i>Epektibong sinusupportahan ng sistema ang pag-iskedyul ng appointment, pamamahala ng mga walk-in na pasyente, at pagproseso ng medical clearance.</i>)					
3. The system generates complete and accurate daily and monthly patient volume summaries. (<i>Lumilikha ang sistema ng kumpleto at tumpak na pang-araw-araw at buwanang buod ng dami ng mga pasyente.</i>)					
4. The system provides useful seasonal disease and patient volume forecasts for clinic planning. (<i>Nagbibigay ang sistema ng kapaki-pakinabang na pagtataya ng mga pana-panabong sakit at dami ng mga pasyente para sa pagpapalano ng klinika.</i>)

5. Overall, the functions provided by the system meet the operational needs of the clinic. <i>(Sa kabuuan, natutugunan ng mga function ng sistema ang mga pangangailangan ng operasyon ng klinika.)</i>					
Reliability	Strongly Agree (5)	Agree (4)	Neutral (3)	Disagree (2)	Strongly Disagree (1)
For Owner/Administrator, Clinic Staff, and IT Experts					
1. The system consistently performs medical service tracking without unexpected failures. <i>(Patuloy na gumagana ang sistema sa pagsubaybay ng mga serbisyong medikal nang walang hindi inaasahang pagkabigo.)</i>					
2. The system remains available during appointment scheduling, walk-in patient handling, and medical clearance processing. <i>(Nananatiling magagamit ang sistema sa panahon ng pag-iskedyul ng appointment, pamamabala ng mga walk-in na pasyente, at pagproseso ng medical clearance.)</i>					
3. The system continues to function properly even when processing multiple patient transactions. <i>(Patuloy na gumagana nang maayos ang sistema kahit sabay-sabay itong nagpoproseso ng maraming transaksyon ng pasyente.)</i>					
4. The system quickly recovers from interruptions without losing patient or clinic information. <i>(Mabilis na nakababawi ang sistema mula sa mga pagkaantala nang hindi nawawala ang impormasyon ng pasyente o klinika.)</i>					
5. I can rely on the system to perform clinic operations accurately and consistently. <i>(Maaasaban ko ang sistema na maisagawa nang tama at tuloy-tuloy ang mga operasyon ng klinika.)</i>

Interaction Capability	Strongly Agree (5)	Agree (4)	Neutral (3)	Disagree (2)	Strongly Disagree (1)
For All Respondents					
1. The functions for medical service tracking are easy to understand and use. <i>(Madaling maunawaan at gamitin ang mga function ng sistema para sa pagsubaybay ng mga serbisyong medikal.)</i>					
2. The appointment scheduling, walk-in patient handling, and medical clearance features are easy to navigate. <i>(Madaling gamitin at i-navigate ang mga feature para sa pag-iskedyul ng appointment, pamamahala ng mga walk-in na pasyente, at pagproseso ng medical clearance.)</i>					
3. The reports and client trend analytics are presented in a clear and understandable manner. <i>(Malinaw at madaling maunawaan ang mga ulat at client trend analytics na ipinapakita ng sistema.)</i>					
4. The system provides clear instructions, messages, and feedback while performing clinic tasks. <i>(Nagbibigay ang sistema ng malinaw na mga tagubilin, mensahe, at feedback habang isinasagawa ang mga gawain sa klinika.)</i>					
5. Overall, the system is easy to learn and convenient to use for accomplishing clinic-related tasks. <i>Sa kabuuan, madaling matutunan at maginhawang gamitin ang sistema sa pagsasagawa ng mga gawaing may kaugnayan sa klinika.</i>					

Department of Computing and Informatics

Research Objective

To design and develop a customized web-based Medical Services Management System with Client Trend Analysis for Living Myth Industrial Clinic that automates, monitor, and manage appointment scheduling, patient records, and medical clearance processes. Specifically, it aims:

1. To evaluate the improved tracking of the medical service that ensures the timely completion of patient requirements through requirement verification, laboratory sample tracking, and service completion monitoring.
2. To compare the efficiency of the current manual clinic processes with the proposed system in terms of:
 - 2.1 Appointment Scheduling Process
 - 2.2 Walk-in Patient Handling Process
 - 2.3 Medical Clearance Processing
3. To assess the feasibility of the proposed system in terms of financial feasibility using cost-benefit analysis.
4. To integrate client trend analytics for predicting patient volume and seasonal diseases using Holt-Winters Triple Exponential Smoothing that will help the clinic anticipate daily and monthly patient numbers in terms of:
 - 4.1 Daily and Monthly Patient Volume Summaries
 - 4.2 Seasonal Diseases Forecasting
 - 4.3 Patient Volume Forecasting for daily and monthly projections
5. To evaluate the level of effectiveness and quality of the system using ISO 25010 in terms of:
 - 5.1 Functional Suitability
 - 5.2 Reliability
 - 5.3 Performance Efficiency
 - 5.4 Security
 - 5.5 Interaction Capability
